CCRIF Makes Payout to Trinidad & Tobago after October Rains

CCRIF SPC (formerly the Caribbean Catastrophe Risk Insurance Facility) announced today that for the second year in a row, Trinidad & Tobago received a payout on its Excess Rainfall policy following a period of heavy rainfall in October. The Government received a payout of US$2,534,550 (approximately TT$17 million) due to heavy rains between October 18 and 20 2018.

CCRIF and CDB Kick off Activities under the Integrated Sovereign Risk Management Project

CCRIF has allocated US$63,000 to Phase 1 of this project which includes the preparation of the Situation, Comparative and Gap Analyses, preparation of the draft standardized integrated risk management framework and the development of the terms of reference for the country risk coordinators. The results of these analyses would inform a regional conference in early 2019. Accordingly, CCRIF has contracted Lumin Consulting, UWI to undertake the studies mentioned above. CDB is expected to contribute an equal amount of resources to this initiative.

CCRIF SPC CEO Abridged Speaking Notes

The story of natural disasters and their impacts in the Caribbean is well-known. In the Caribbean and Central America the frequency of hazards and disasters is increasing, and although mortality resulting from disasters seems to be decreasing, economic costs are rising precipitously. In fact the Caribbean region is one of the most...
Since 2007, CCRIF SPC has made 38 payouts to 13 member governments on their tropical cyclone, earthquake and excess rainfall policies totalling almost US$139 million.
