

Cayman Islands

Earthquake

16 October 2021

Final Event Briefing

27 October 2021

1 INTRODUCTION

A magnitude 5.4 earthquake occurred at 18:27:28 UTC on 16 October 2021, 73.8 km (45.8 mi) SSW of George Town, Cayman Islands; 79.9 km (49.7 mi) SSW of West Bay, Cayman Islands and 79.6 km (49.5 mi) SW of Bodden Town, Cayman Islands. Estimates from the United States Geological Survey (USGS) located the epicentre of the event at 18.703°N, 81.706°W, and at a depth of 10.0 km (6.2 mi – Figure 1). Cayman Islands was the only CCRIF member country where peak ground acceleration, computed with the CCRIF System for Probabilistic Hazard Evaluation and Risk Assessment (SPHERA) model, was greater than 0.01 g for this earthquake.

Final runs of CCRIF’s loss model estimated no government losses for the Cayman Islands and therefore no payout under the country’s earthquake policy is due.

2 CCRIF MODEL OUTPUTS

Under CCRIF’s loss calculation protocol, a report using the CCRIF SPHERA model is produced for any earthquake with a magnitude greater than or equal to 5.0 that occurs within the region monitored by CCRIF and which generates a peak ground acceleration of at least 0.01 g in one or more grid cells of at least one CCRIF member country. Based on the SPHERA footprint for this earthquake, peak ground acceleration of up to 0.015 g was estimated in the Cayman Islands (Figure 2), but under SPHERA, the earthquake generated a loss estimation of zero.

3 IMPACTS

Ten days after the earthquake’s occurrence, no information was available related to damages or loss in the Cayman Islands due to this earthquake.

According to the USGS “*Did You Feel It?*” online tool², 11 persons in the Cayman Islands within a radius of 81 km (50.3 mi) from the epicentre reported the earthquake as being a “weak shake with no damage” (Mercalli intensity: II - III).

4 TRIGGER POTENTIAL

Final runs of CCRIF’s loss model generated no government losses for the Cayman Islands for this earthquake and therefore no payout is due under the country’s CCRIF earthquake policy.
